

The Fusion Frame not only shares the same lines and beauty of the Samsung "The Frame" display, but also provides a dynamic two-channel and/or LCR audio solution. At only 1.75" deep, this cutting-edge design incorporates a radical approach to internal air load management and driver construction. Our proprietary 4.5" aluminum convex cone driver exhibits a unique and powerful rare earth neodymium motor system that promotes high acceleration and excursion, with ultra-low distortion. Simply put, where our competition has failed, Next Level Acoustics shines. The Fusion Frame delivers enhanced audio dynamics featuring a smooth linear midrange response with natural bass at a staggering 1.75" deep.

FEATURES INCLUDE:

- Ultra-low profile at 1.75" depth
- Black mesh acoustic grille (additional options available)
- Extraordinary acoustical dynamics and clarity
- Proprietary driver and crossover configuration
- Seamless framed finish to mimic the Samsung "The Frame" aesthetics
- Flush wall pass-through mounting system
- Flipped speaker terminal cups for easy cable management wiring access
- 43", 49", 50", 55", 65", 75" (Stereo) / 55", 65", 75" (LCR)
- Available in Black, White, Beige and Walnut, as well as custom paint match frame finishes

Fusion Frame 43" Stereo
